Northstar evidence pack - incident-clock/1

Evidence pack: clock-pack.json
Format: northstar-evidence-pack/1
Ruleset: incident-clock/1 (version 0.1.0)
Subject: SIMULATED terminal operator, incident SIM-2026-0302, aware 2026-03-02T22:45:00Z, state at 2026-03-04T12:00:00Z
Sealed by (Ed25519): 5387589f06cc42f977ab9f878166ff4516d92429940d307a6b09c0dff702b01a (compare the fingerprint out of band)
Seal checked when this PDF was made: VERIFIED
Result: exceptions - 5 stage(s): 1 on time, 1 late or overdue, 3 open
Licence: EVALUATION COPY - NOT FOR RELIANCE
Documents attached: 3 of 3 match the hashes in the pack
To check: drop this PDF into the Northstar file checker (northstar-verify).
These pages are for reading. The attached pack is what is verified. SIMULATED DATA.

```
The reporting deadlines of incident SIM-2026-0302 were computed from its hash-chained log under ruleset
    incident-clock/1

Result: 5 stage(s): 1 on time, 1 late or overdue, 3 open

What this pack does not establish:
  - Deadlines are computed from the times recorded in the log; the moment of becoming aware is as the
    entity recorded it, and the recorded_at times are the recorder's own clock unless timestamp
    evidence is attached.
  - The stage contents are summaries of the articles; the authority's own form and national law decide
    what is required.
  - Which regimes apply to the entity (NIS2, CER, CRA) is the entity's own determination.

Intended users: the entity, its management body and the authorities it reports to
Reliance: Supports meeting and showing the reporting deadlines. It does not decide which regimes apply.
