Northstar evidence pack - bastion/1

Evidence pack: site-file.json
Format: northstar-evidence-pack/1
Ruleset: bastion/1 (version 0.1.0)
Subject: site SIM-T1 (SIMULATED LNG export terminal), 2026-03-02T00:00:00Z to 2026-04-05T22:45:00Z - SIMULATED DATA
Sealed by (Ed25519): 5387589f06cc42f977ab9f878166ff4516d92429940d307a6b09c0dff702b01a (compare the fingerprint out of band)
Seal checked when this PDF was made: VERIFIED
Result: exceptions - 25 event(s), 7 alert(s); 1 near-fix link(s), 2 vessel link(s), 2 co-timed link(s); 0 input(s) left out
Licence: EVALUATION COPY - NOT FOR RELIANCE
Documents attached: 5 of 5 match the hashes in the pack
To check: drop this PDF into the Northstar file checker (northstar-verify).
These pages are for reading. The attached pack is what is verified. SIMULATED DATA.

```
The listed layer packs for site SIM-T1 were checked and joined into one timeline under ruleset bastion/1

Result: 25 event(s), 7 alert(s); 1 near-fix link(s), 2 vessel link(s), 2 co-timed link(s); 0 input(s)
    left out

What this pack does not establish:
  - This file joins the listed layer packs; each layer's own limitations (in its own pack) still apply.
  - A VESSEL link means the same MMSI or IMO appears in several layers; a NEAR FIX link means two
    observers' bearings cross within 3 km of a vessel's AIS position; a CO-TIMED link means events fall
    within 3 hours of each other. None is a finding that any vessel or person did anything.
  - Inputs whose integrity did not verify are listed and were left out of the timeline and the links.
  - Times are as each layer recorded them.

Intended users: the site's security and compliance functions, its insurers, and the authorities it
    reports to
Reliance: Supports investigation and reporting of incidents at the site. It does not decide cause or
    responsibility.
